

FreeBSD ports

**Case study: managing a worldwide open source project:
FreeBSD port manager**

FreeBSD ports

Me

- user since 2000
- submitter since 2002
- committer since 2003
- portmgr secretary since 2004
- portmgr since 2005

FreeBSD ports

FreeBSD

- Open Source OS under BSD licence
 - derived work need not be open source
- BSD Unix derived
- Used by ISPs: Y!, ISC
- Appliance/ product foundation: Juniper JunOS, OS X

FreeBSD ports

Default installation gives a "base system"

Kernel:

- Hardware drivers
- Packetfilterse: ipfw(4), pf(4), ipf(4)
- Networking: ppp(4), tunnel (gif(4), gre(4), tun(4))
- Software RAID

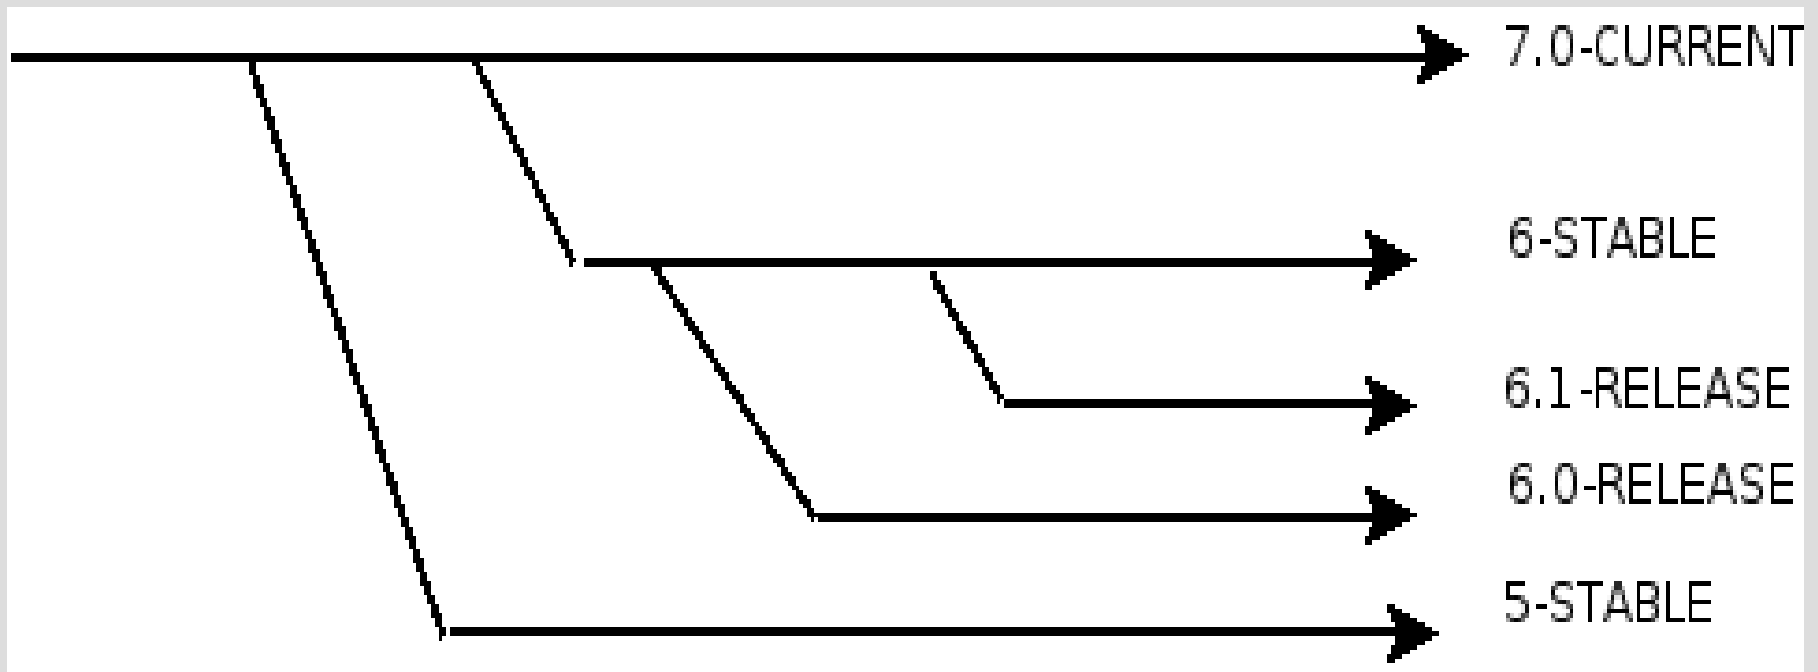

Userland:

- sh(1), tcsh(1)
- OpenSSH, inetd(8), ntpd(8), named(8), sendmail(8)
- make(1), gcc(1)
- vi(1), ee(1)

FreeBSD ports

Release cycle

FreeBSD ports

Communication

- mostly online
 - 40 active mailinglists
 - mostly public
- IRC channels
- Wiki
- Conferences
 - USENIX
 - BSDCon
 - BSDCan
 - EuroBSDCon
 - AsiaBSDCon
- devsummits

FreeBSD ports

Development

- used VCS from day 1
- GNATS as bugtracking software
 - Send-pr(1)
 - <http://bugs.freebsd.org/>

CVS repository in 3 parts

- src - kernel, userland
- doc - books, articles, website
- ports - 3rd party software

FreeBSD ports

Submitter

Anyone who sends bug reports and/ or patches

Committer

- Someone with write access to CVS
- Significant code contributions
- Long term commitment
- Mentor proposes and voted on by relevant authority

FreeBSD ports

Committers – random statistics

- 216 src
- 177 ports
- 84 doc

- 370 total

(note: overlap)

FreeBSD ports

Committers – random statistics

Where

- 34 countries
- 6 continents

Age

- Oldest: 1948
- Youngest: 1989

FreeBSD ports

Organization

Core team:

- 9 members
- Elections for core every 2 years from and by active committers
- Project direction
- Rules
- Conflict resolution
- Delegated ports to portmgr, doc to doceng

FreeBSD ports

Other teams

- Release engineering
- Security officer / security team
- Admins
- GNOME/ KDE/ java/ ...

FreeBSD ports

Ports

Ports are small pieces of code to integrate 3rd party software

Written in BSD `make(1)` and `sh(1)`

~ 16.000 ports

Packages

FreeBSD ports

Ports

- `bsd.ports.mk`
- ~ 6000 lines
- `bsd.apache.mk`, `bsd.java.mk`, `bsd.kde.mk`, `bsd.gnome.mk`, `bsd.ruby.mk`, etc.
- Small Makefile
 - Where to fetch sources
 - Description
 - How to build, install and deinstall
 - FreeBSD specific patches
 - Startup scripts
- Porters handbook

FreeBSD ports

Submitter

Anyone who sends a patch

MAINTAINER

A person or group that actively maintains a port and has to approve any changes

Committer

A person with write access to the ports part of CVS

FreeBSD ports

More random statistics

- 1439 maintainers
- 177 committers
- many, many submitters
- > 100 commits per day

FreeBSD ports

Portmgr

- 6 persons
- appointed by core
- core oversight
- charter
- policies
- QA
- new committers
- conflict resolution
- secretary
- montly reports

FreeBSD ports

Quality assurance

- pointyhat cluster
- Gohans
- "krismails"
- korean ports cluster
- Portsmon
- Package building (ftp/release cd)
- 4 branches
- 3 major architectures (i386, amd64, sparc64)

http://pointyhat.freebsd.org/errorlogs/packagestats.html

FreeBSD package building statistics

as of Sat Oct 28 13:15:00 UTC 2006

	cvs date	latest log	INDEX	packages	errors	skipped	missing	done?
amd64-5	Oct 4	Oct 9	15828	13569	243	1185	831	Y
amd64-6	Oct 27	Oct 28	15917	13963	20	1170	764	N
amd64-7	Oct 12	Oct 16	15887	13512	105	1230	1040	N

	cvs date	latest log	INDEX	packages	errors	skipped	missing	done?
i386-4	Oct 6	Oct 10	15847	11612	257	2298	1680	Y
i386-5	Oct 24	Oct 27	15918	15096	88	599	135	Y
i386-6	Oct 27	Oct 28	15918	14695	18	561	644	N
i386-7	Oct 26	Oct 28	15918	14679	34	620	585	N

Package building errors

View by [[port](#) | [maintainer](#) | [category](#) | [error](#) | [builddate](#)]

CVS update finished at: Sun Oct 15 21:57:26 UTC 2006

Timestamp of newest log: Oct 28 03:02:16 2006

"Aff." is number of ports that depend on this one

"[B]" indicates port is marked BROKEN (Note: BROKEN ports are not frequently rebuilt so they may not be listed here)

20 errors

Port	Aff.	Size	CVS	Maintainer	Reason	Build date
diablo-jdk-1.5.0.07.01	349	4 Kb	java/diablo-jdk15	glewis@FreeBSD.org	fetch	Oct 28 02:33:11 UTC 2006

FreeBSD ports

Policies

- inactive committers
 - 1 year
- inactive maintainers
 - Approval: 2 weeks
 - Reset: 3 months

FreeBSD ports

Policies

”New ports should only be submitted by someone who is actually using the software and will continue to use the port to maintain the software.”

- Too much software (CPAN / SF.net)
- Limited resources
 - Committers
 - Cluster
- Common sense

FreeBSD ports

What changes are allowed and when
bsd.ports.mk

All commits must be regression tested and approved by portmgr

FreeBSD ports

What changes are allowed and when *When the tree is frozen*

All changes must be approved by portmgr. In general, only the following will be accepted:

- fixes that would prevent a port from installing, deinstalling or running properly for the upcoming release.
- security problems.
- licensing issues.

FreeBSD ports

What changes are allowed and when
When the tree is thawed

No sweeping changes

- a commit that would affect a non-trivial number of packages

FreeBSD ports

Policies

Supported releases

In general, follows the EOL set by security officer.
FreeBSD 4.x has EOL January 31st, 2007

- Package building/regression testing deprioritized
- Infrastructure (bsd.ports.mk) supported until EOL date
- Individual ports can be marked broken
- Patches still accepted
- Users encouraged to upgrade
